WRS ENVIRONMENTAL SERVICES ANNOUNCES THE ACQUISITION OF ACTIVE WATER JET, INC

Yaphank, NY: [WRS Environmental Services](#), the leading provider of environmental, energy and industrial services as well as hazardous waste management services throughout the Mid-Atlantic Northeast, announced today the completion its acquisition of Active Water Jet, Inc. (AWJ) of Cranford, New Jersey. The 20-year old company, AWJ specializes in high pressure water blasting, industrial power vacuuming, and a skilled labor force.

“The acquisition of Active Water Jet aligns perfectly with our strategy of expanding our Environmental Services business in the Mid-Atlantic Northeast,” stated CEO Michael Rodgers. “Active Water Jet brings well-established leadership positions in several important markets, including industrial water blasting and industrial power vacuuming providing us a stronger foothold in this industry that allows us to respond more quickly to our clients’ needs. We welcome Active Water Jet’s employees to the WRS team and look forward to advancing our combined organization.”

AWJ offers a full line of Woma high-pressure pumps, blasters up to 40,000 psi, Guzzler vac trucks 6000CFM. In addition, WRS will be able to enhance its own highly skilled, safety conscious work-force with additional OSHA trained staff that have experience in dealing with hazardous waste. WRS has been given top rating by not only its customers, but by ISNetworld where they have earned an A rating.

Rodgers said with the acquisition and growth of WRS, the company has expanded its existing facility in Edison, New Jersey and more than doubled the space. That facility will house a full line of equipment and employees to support all environmental services.
